Employment Laws and Regulations (e.g., Minimum Wage, Overtime, Discrimination), Equal Employment Opportunity (EEO), Workplace Safety and Health (OSHA), Labour Unions and Collective Bargaining, Employment Contracts and Agreements, Data privacy in HR.

12. HR Policies

Developing and Implementing HR Policies, Types of HR Policies (e.g., Attendance, Leave, Code of Conduct), Communicating and Enforcing HR Policies, Policy Review and Updates, Policy Documentation.

13. AI in HR Functions

AI in Recruitment and Selection (e.g., AI-powered screening, chatbots), AI in Training and Development (e.g., Personalized learning, AI-driven coaching), AI in Performance Management (e.g., Predictive analytics, AI-based feedback), AI in Employee Engagement and Retention (e.g.,

Sentiment analysis, AI-driven surveys), Ethical Considerations of AI in HR, HRIS and AI integration.

14. Differentiation in Traditional and Modern HR Models

Traditional HR (Personnel Management) vs. Modern HR (Strategic HR), Focus on Administration vs. Focus on Strategic Partnership, Transactional vs. Transformational HR, centralized vs. Decentralized HR, Role of Technology in Modern HR, Data driven HR.

FINANCE

ACCOUNTING:

Unit I - Book-Keeping, Accounting Conventions and Assumptions - Financial Accounting Concepts and Principles – Single Entry System and Double Entry System – Accounting Process - Capital and Revenue Expenditure and Receipts.

Unit II - Depreciation - Meaning, Importance and Methods of Depreciation - Accounting Procedure of Depreciation under various methods.

Unit III - Ratio Analysis - Importance and Limitations - Types of Ratios and its Procedure for calculation - Profitability Ratios, Solvency Ratios, Liquidity Ratios, Turnover Ratios and Market Value Ratios - Funds Flow Analysis & Cash Flow Analysis.

Unit IV- Marginal Costing - Meaning and Importance - Difference between Marginal costing and Absorption Costing - Break Even Analysis - Concepts and Procedures - Decision making based on Marginal Costing.

Unit V - Cost Accounting - Basics concepts and Importance - Cost Sheet Procedure - Direct Cost and Indirect cost - Overhead classification and procedure - ABC Costing concepts, Importance, Application and Procedure.

FINANCIAL MANAGEMENT:

UNIT I - Financial Management - Financial Goals - Decisions of Finance - Profit Vs Wealth Maximisation - Cost of Capital - Cost of Equity - Cost of Debt - Concepts and Procedure.

UNIT II - Capital Budgeting - Investment Decisions and its Criteria - Methods of Capital Budgeting - NPV, IRR, PI, ARR, Payback methods.

UNIT III - Operating Leverage, Financial Leverage and Combined Leverage - Importance, Usage, Application and Procedure - Capital Structure Theories and its Assumptions - NI approach, NOI approach, Traditional approach and MM approach.

UNIT IV - Dividend Policies and Decisions - Determinants of Dividend Policy - Theories of Dividend policy - Relevance and Irrelevance theories concepts and assumptions.

UNIT V - Management of Working Capital - Importance, Concepts and Types of Working Capital - Operating Cycle - Sources of Working Capital - Factors affecting Working Capital.

ADDITIONAL TOPICS TO BE PREPARED:

- Banking
- Insurance & Risk Management
- Basics of Financial Markets and Financial Instruments
- Taxation – Income tax and GST
- Basics of Audit and Assurance; Regulatory Bodies – SEBI, RBI, ICAI, IRDAI etc.

LOGISTICS AND SUPPLY CHAIN MANAGEMENT

UNIT 1: Logistics management and Supply Chain management - Definition, Evolution, Importance. The concepts of logistics and Supply Chain Management, Key Drivers of Supply Chain Management and Logistics relationships, SCOR (Supply Chain Operations Reference) Model.

UNIT 2: Basics of Transportation, Transportation Functionality and Principles; Multimodal Transport: Modal Characteristics; Modal Comparisons; International Air Cargo Transport; Coastal and Ocean transportation, Characteristics of shipping transport- Types of Ships.

UNIT 3: Containerization: Genesis, Concept, Classification, Benefits and Constraints; Inland Container Depot (ICD): Roles and Functions, CFS, Export Clearance at ICD; CONCOR; ICDs under CONCOR.

UNIT 4: Packing and Packaging: Meaning, Functions and Essentials of Packing and Packaging, Packing for Storage- Overseas Shipment Inland-Transportation- Product content Protection, Packaging Types: Primary, Secondary and Tertiary- Requirements of Consumer Packaging, Channel Member Packaging and Transport Packaging - Shrink packaging –Identification codes, bar codes, and electronic data interchange (EDI)- Universal Product Code- GS1 Standards- package labels- Symbols used on packages and labels.

UNIT 5: Special Aspects of Export logistics: Picking, Packing, Vessel Booking [Less-than Container Load (LCL) / Full Container Load (FCL)], Customs, Documentation, Shipment, Delivery to distribution centers, distributors and lastly the retail outlets- Import Logistics:

Documents Collection- Valuing- Bonded Warehousing- Customs Formalities- Clearing, Distribution to Units.

ADDITIONAL TOPICS TO BE PREPARED:

1. **Multi-Modal Transport & Logistics Management:** Multi-Modal Transport Systems, Shipping & Logistics Management, Third-Party Logistics (3PL), Fourth-Party Logistics (4PL)
2. **Demand Forecasting:** Methods of Demand Forecasting (Qualitative & Quantitative), AI & Machine Learning in Demand Forecasting.
3. **Inventory Management:** Inventory Types and Control Techniques, Economic Order Quantity (EOQ) Calculation, Safety Stock and Reorder Point, Just-In-Time (JIT) & Lean Inventory Concepts, Inventory Optimization Techniques, ABC/XYZ Analysis
4. **Warehouse Management:** Functions of Warehouses, Types of Warehouses (Private, Public, Bonded, Automated), Role & Responsibilities of Warehouse Manager, Warehousing Management Systems (WMS), Automation in Warehousing (Robotics, AS/RS), Cold Chain Logistics & Specialized Storage.
5. **Sustainability in Supply Chain:** Green Logistics & Reverse Logistics, Carbon Footprint Reduction Techniques, Circular Supply Chain Management, Regulatory Compliance for Sustainability.

SYSTEMS

1. **Introduction to MIS:** Concepts & Types, Information Systems in Functional Areas (HR, Finance, Marketing), Decision Support Systems & Executive Information Systems, System Development Life Cycle (SDLC)
2. **ERP:** Architecture, Modules, Implementation Cycle, Benefits & Challenges of ERP, Introduction to BPR: Steps & Methodologies, ERP vs BPR: Integration and Transformation
3. **Project Life Cycle:** Initiation to Closure, Cost, Time, and Scope Management, methodology used, Agile methodology, life cycle
4. **Basic DBMS Concepts:** Tables, Queries, Normalization, Data Warehousing Introduction to APIs, OLTP vs OLAP: Concepts, Examples, Architecture, Data Mining: Association, Classification, Clustering
5. **Digital Transformation & Emerging Technologies** - Descriptive, Diagnostic, Predictive, and Prescriptive Analytics, Predictive Modeling Tools: Regression, Decision Trees
6. **Cloud Computing** (SaaS, IaaS, PaaS) & Chatbots, Cybersecurity Basics, LLM & Basics of AI, RPA and Chatbots in Enterprise Systems
